

# GInMA installation guide

## System requirements

### Operation system:

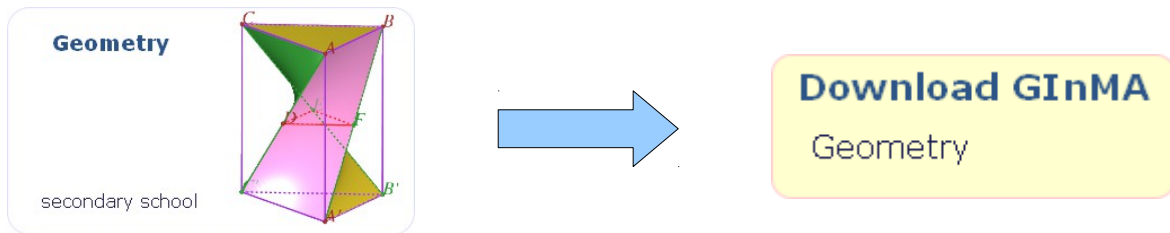

Microsoft Windows 2000, XP, Vista 7.

### Minimum configuration for PC:

CPU: 800 MHz, RAM: 256 MB, OpenGL- compatible graphic card with 64 MB RAM.

## Program installation

On website [deoma-cmd.ru](http://deoma-cmd.ru) open [Geometry](#) and download setup file.

Setup **GInMA** by double-click and click on button *Install*. If **GInMA** icon doesn't appear on the work table click on the empty place of the work table and press **F5**.

## Program start

After the installation you will be asked to run **GInMA**. Next times for **GInMA** running you can use **GInMA** icon.

You can also use menu *Start > All programs > Deoma > GInMA*.

When **GInMA** runs for the first time, it asks you to *Activate* it or to *Run demo version*. If you purchased a license, choose *Activate*. In another case choose demo version. (In this case, when the program runs next times it will ask you again to *Activate* it).

## Program activation

Program activation requires the program license purchase by any convenient method as described on the site, and verification of payment.

In program activation window choose the mode of activation in accordance with the purchase (one product, all products, thematic set). The program will show your *PC identifier* (for example 1234-5678-90AB-CDEF) and three-digit *check number*, which both you need to send us. Use e-mail [vvsss@rambler.ru](mailto:vvsss@rambler.ru). You will then receive *activation key (password)* for your computer and *check number* that must be entered.

When you reinstall operation system, you may need to re-enter your password. Password must be replaced if you significantly change the configuration of the computer system unit.
